HISTORY

Dr. Stevens was originally recruited to work with the Department of Defense, working on ultra-secret biochemical research, working on antidotes and countertoxins to potential biological warfare threats. Disillusioned by the amount of actual "good" she was doing, she moved to the CDC to prevent pandemics and outbreaks of diseases and viruses. She had only been with the CDC for a matter of months when she stumbled upon Martha Hillston, a psychic for MKULTRA. Discovering the secret psychic program, she was recruited into Aegis. Her first Cell, with Martha, met with disaster at the hands of the NDD, and only Martha and Carla survived. Carla was assigned Cell leader, a Cell leader determined not to lose another agent again.
